

Security Audit Report - IndianTradeMart

Executive Summary

Overall Risk Level: HIGH. Multiple critical vulnerabilities identified including IDOR, Broken RBAC, File Upload XSS, CSRF risks, and Payment Manipulation.

ID	Vulnerability	Severity	Impact
V-01	IDOR	Critical	Data Leak
V-02	Broken RBAC	Critical	Admin Takeover
V-03	File Upload XSS	Critical	Account Compromise
V-04	CSRF	High	Unauthorized Actions
V-05	Payment Tampering	Critical	Financial Loss

V-01: IDOR Vulnerability

Authenticated users can access other vendor data by modifying IDs in API endpoints.

Impact: Data leakage and privacy breach.

Recommendation: Enforce strict ownership validation on backend.

Conclusion

The platform architecture is strong but lacks strict backend security enforcement. Immediate fixes required.
